Digital Signal Processor

Open for everything…

You can hear music from EVERYWHERE: from your smartphone with any music app, TV, iPod, FM and DAB+ radio, Spotify Connect, AirPlay or Bluetooth, built-in streaming services and of course over 65000 Internet radio stations.

You can listen to music LOUD: Because the AudioBox P150 has a full 2x150 Watts. And the built-in power supply does even more.

You can PERFECTLY listen: to music. Because the AudioBox P150 plays high quality music data with 192kHz/32 bit. That's studio quality. That's HighEnd. That's just great.

DAB+ or FM?

For many people, radio is an essential part of their everyday lives: news, music, current affairs and presenters they have known for many years. The radio is often on all day long. And with DAB+ this radio sounds now first-class and is also future-safe. Because analog radio is more and more switched off, because the future of radio is called DAB+.

The AudioBox P150 doesn't care: The built-in radio plays DAB+ stations as well as FM stations. It all depends on the radio station and your reception.

Design

Because design is the handling of forms, lines, materials and proportions. It is the opportunity to leave a mark and give technology a face. With the AudioBox P150 we have put the material in the foreground and have come across the combination of aluminium and wood. Opposite, but pleasantly different.

We immediately liked the contrast between the always different, warm wood and the hand-brushed, cool aluminium. It stands for technology and sustainability. This is also what trivum stands for: Durable products Made in Germany - together with many local suppliers.

KNX Support

In the AudioBox P150, numerous objects are available for control and query using KNX addresses. Most trivum functions can be triggered by KNX telegrams and a lot of information can be sent as telegrams.

Technical data

Zones	Expandable up to 64 zones
Radio	DAB+/FM Tuner
Streaming	up to 192kHz 32Bit
Sources	Streaming DAB+/FM Tuner Bluetooth Line Input analog Line Input digital (TOSLink)
Music formats	MP3, AAC, FLAC, M4A, WMA, ALAC
Connections	1x network (RJ45 socket) 1x USB (for service) 1x loudspeaker stereo (2x 2-polige speaker terminal) 1x line output stereo (2x cinch sockets) 1x line input stereo (2x cinch socket) 1x line input digital (1x TOSLink sockets) 1x line output digital (1x TOSLink socket) 1x DAB+/FM antenna (F-socket) 1x WLAN/bluetooth antenna (SMA socket) 1x Power
